

Direct Heating (DHE)

Certification Program

AHRI is the world's most trusted source of performance certified heating, cooling, ventilation and commercial refrigeration equipment and components. Only products that have passed AHRI's rigorous third-party testing can display the AHRI Certified mark. Find certified products at www.ahridirectory.org.

Related Standard

Products in the Direct Heating certification program are tested to the latest edition of the Code of Federal Regulations, 10 CFR Part 430.

Program Scope

All gas and oil direct heating equipment whose energy input ratings are within the parameters outlined below are included in the program:

"Vented home heating equipment" or "vented heater" means a class of home heating equipment, not including furnaces, designed to furnish warm air to the living space of a residence, directly from the device, without duct connections (except that booths not to exceed 10 inches beyond the casing may be permitted) and includes: vented wall furnaces, vented floor furnace, and vented room heater. Further definitions are available on AHRI's website.

This program independently verifies annual fuel utilization efficiency and heating capacity.

The **AHRI Certification Program** is a voluntary program, administered and governed by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI), which ensures that various types of heating, ventilation, air conditioning, refrigeration, and water heating products perform according to manufacturers' published claims. Products that are certified through the AHRI Product Performance Certification Program are continuously tested, at the direction of AHRI, by an independent third-party laboratory, contracted by AHRI, to determine the product's ability to conform to one or more product rating standards or specifications.
